

SCOTT/PRINZ U.S. MOUNT SIZER

The following list will help you determine the mount size for selected mini-sheets, self-adhesive panes and souvenir sheets. The first column is the Scott catalog number of the item & the second column is the Stock # for the mount size. In some cases, this is the closest mount size for that item and may have to be trimmed to fit properly.

HOW TO DETERMINE MOUNT SIZE

We are pleased to offer this mount-size to help you to determine the size you will need for popular sheets and other large pieces. For other items, you will need to determine the proper size yourself and decide what to order. To do this, you will need a ruler with a millimeter scale (usually on the opposite edge from the inches scale).

You need to measure the width first and then the height to match the measurements in our listings.

Important: keep in mind that the width can be cut to fit the size of the item but the height cannot be altered.

Not every item has a mount the exact size and you may have to use a mount a few millimeters taller than the item you are mounting. However, a few millimeters won't make a sizable difference.
